Sample project

- Login system
- Booking ticket
- Order foods and drinks
- Showing Movies and food menu
- New movies announcement
- Cancel ordering
- Discount and competition events

_Executive Summary:

Cinema is a theatre where films are shown for public entertainment everywhere around the world. However without the applications and the websites, the cinema cannot sell its products such as movies, cartoons and animations to its customers.

As discussed in our conversation, the team of 5 the "Loyal Boy" from department of Applied Mathematics and Statistics of Institute Of Technology Of Cambodia would love to create a program for you that could help the cinemas to expand their businesses in the whole country.

This program would feature an easily updatable reservation of movies, foods and drinks with international and khmer currency and other features to provide convenience to our beloved customers. We anticipate that this program we help cinemas to increase their sales of entertainments by 500% in the next 2 years.

Project program's background

Loyal Boy De Technologie is a program design firm based in Toul Kouk district (Phnom Penh). We have a long journey of working with programming, especially programming based on real life problems. We are very honored and passionate about helping growing businesses to grow more powerful in this digital world and we built on our success with accessible and functional programs. And we believe this program should complement your existing business practices. We think this philosophy makes us an excellent fit for your retro-influenced company.

Benefit of online booking

One of the main benefits of online booking systems is that they allow customers to place their booking at a time that is most convenient for them. Using an online booking system, they can make their booking at any time of day or night, without having to worry if it's within business hours or not.

Popularity of Cinema

Cinema is so much popular today because it it the cheapest source of entertainment and a scour of knowledge and information.

Online Cinema and Foods reservation system

Therefore, this project will bring convenience to those who like to watch movie without spend much time buying or queuing to buy tickets, it just online order tickets of movie and foods that you want, and go directly to the cinema. Moreover, that also can get more coupons and online pay.

How does this program work?

We've planned to create a simple yet stylish program to fits the existing cinemas brand in our country. It will be user-friendly for your existing and growing customers base and easily updatable through a content management system to ensure it always reflects current stock of movies and promotions. It will help your business become more competitive as people increasingly looking for online movie-reservation solutions.

The program will have the following components:

- -An online reservations system that lets customers search for movies, cartoons, animations including foods and beverages and purchase them via their electronic devices.
- -Automatic currency conversion(from KHR to USD and from USD to KHR) and online reservations system make reserve anywhere in the country conveniently.

-A program that you can update at any time with new posts about informations, new movies arrival announcement, foods and beverages.

- -This online reservations system will accept any payments from credit cards to digital wallets.
- -A contact information with our company's addresses, telephones and a contact form that customers can complete to email the administrations.

We will provide free ongoing support for the first three months after delivery. After that time, we will happily resolve any issues for a small amount of fees. We expect our program will go to live in three months after your acceptance of our proposal. After that time, the cinemas will take complete ownership of the project.

Financials

We will charge \$5500 to build this program. This cost includes the following:

- -Spending most of our precious time to create a lovely and cute program that can help you expand your businesses.
- -Total developing design and creation of PROS!.
- -Pouring our years of knowledges and trainings to create it.
- -Integration of our internet wallet payments.
- -Troubleshooting and bug assistance three months after the delivery.

Additional Document

Ladyboy De Technologie attached the following documents:

-A list of contacts of Lady Boy De Technologie employees working on the project.

-A page of testimonials from other retailers that had used our services.

-An address of our company's training center for those who want to learn from us.

• Online cinema and foods reservations system project is aimed to provide facility to book cinema tickets and all kinds of food anytime and from anywhere.

Some important goals of online cinema and food reservations are as follows:

- One objective of this project is to minimize the number of staffs at the ticket-box
- window.
- Promote new movies over the internet and gain maximum profit.
- Provide a 24x7 service to the customer.

<u>Conclusion</u>

This project which allows user to booking or buy movie tickets and foods at any time without spend much time. In the purpose of motivating people more and more like watching movies.
